

Sayan Chakraborty

User Experience Designer

 Portfolio: uxsayan.in

 ux.sayan@gmail.com

 linkedin.com/in/sayanoriginals

Summary

User Experience Designer, working in designing and delivering enterprise-scale solutions. Focused on creating simple, intuitive, and inclusive experiences, while actively teaching design, mentoring peers, and continuously practising to strengthen UX and visual design skills.

Experience

IBM India Software Labs

UX & Visual Designer

Kochi, India • Jul 2024 - Ongoing

- Delivered in-product visual analytics for conversion goals, funnel drop-offs, and user progression within Instana, enabling teams to monitor business and finance critical signals directly inside the platform. Reducing dependency on external tools, improved operational visibility, and supported faster, more informed decision-making tied to MTTR reduction.
- Designed the Task Hierarchy View for GenAI Observability, introducing a task-level abstraction over agent execution to replace span-heavy trace analysis. Enabled AI engineers to understand agent intent, task decomposition, parallel execution, retries, aggregated task metrics, and LLM call attribution, aligned with OpenTelemetry GenAI semantic conventions and emerging AgentOps practices.
- Improved CI/CD observability workflows by introducing visuals and interactions that enabled automated GitHub script retrieval, reducing test setup time by 40–50% and lowering version mismatch errors by ~30%, directly improving release reliability and operational efficiency.
- Integrated Carbon-compliant data visualizations and UX patterns directly into ongoing Instana initiatives, creating reusable, production-ready assets adopted across multiple product areas. Improved visual consistency, data readability, and interaction predictability, contributing to a more seamless, scalable observability experience across the Instana platform.

Visual & UX Design Intern • IBM

Kochi, India • Jan 2024 - Jun 2024

Completed my graduation project and internship at IBM on Instana Observability, applying Enterprise Design Thinking and the Carbon Design System to deliver UX and visual design artifacts supporting product roadmap discussions.

Avantika University | MIT Institute of Design

Visiting faculty & Course lead

Ujjain, India • Dec 2025 - Jan 2026

Designed and delivered a Visual & UI Design course, combining theory and hands-on Figma exercises, and mentored them through a final exhibition to showcase their work, apply design thinking, and receive critique focused on clarity, usability, accessibility, and real-world design decisions.

Academics

Avantika University | MIT Institute of Design

B.Des User Experience Design – Silver medal recipient

Ujjain, India • 2020-2024

Ryan International School, Sanpada

Senior Secondary – Science

Navi Mumbai, India • 2018 - 2020

Skills

UX Research	Design thinking	Wireframing	Accessibility
Visual Design	Interaction Design	Prototyping	Oratory
Figma	Presentation	Gemini	Illustrator

Certifications & Awards

Silver Medalist B.Des User Experience Design

Awarded by Avantika University
Jan 2025

IBM Design Thinking Co-creator badge

Issued by IBM
May 2025

IIT Guwahati 2nd Runner up UX Hackathon

Awarded by IIT Guwahati
Jun 2021

IF Design Awardee: IBM Instana Observability

Issued by IF Design Awards
February 2026

Trustworthy AI & AI Ethics

Issued by IBM
May 2025

Oratory skills award

Awarded by Ryan international group of Institutions
Jan 2020
